#### Causal-Comparative Examination of the Attachment Style Effects on Black Student Achievement

I have been informed that my parent(s)/guardian(s) have given permission for me to participate in a study concerning my connectedness to my primary caregiver (e.g., parent or guardian) and its link to my academic achievement (e.g., cumulative GPA and PSAT/NMSQT).

I understand that I will be asked to take an online survey that will last for 20 minutes.

My participation in this project is voluntary and I have been told that I may stop my participation in this study at any time. If I choose not to participate, it will not affect my grade in any way.
